Influence Quotient: 80/100

Overall Evaluation Summary

Qualitative Analysis - Positive

- You introduced yourself effectively by name, the role you are applying for, and mentioned your dream company
- You did well describing your qualifications and in-progress projects by mentioning that you are doing M.Tech in AI related field from IISC and your project on LLM for privacy protection and CNN, PCI shift
- You gave a good insight into your personal life by mentioning your hobbies and interests

Qualitative Analysis - Areas of Improvement

- Although you have shared that your hobbies are reading books, more elaboration would have been great. For instance, mentioning what types of books you prefer reading could give us more insight

into your personality and interests

- Your answer to your weakness was about sweets which doesn't align well with the professional context of this interview. It would be better to mention a weakness that is more related to your professional skills or temperament and also how you're working on improving it
- When asked about your strengths, it is ideal to give direct answers first, followed by examples or instances where you have exploited these strengths. You delved into a specific scenario before stating clearly what your strength is
- The question to our company regarding the release of MR headset shows your interest in the industry, but it would be more helpful if you asked something regarding your role, department or team in the company
- When asked if you have a question for us, asking about the direction of the company, future projects, or the company's expectations for the role you are applying for could have showcased your enthusiasm more clearly

Detailed Evaluation Metrics

No.	Items to look out for	5 point Scale	Remarks / Feedback
1.	Did the speaker speak with confidence? • Posture • Smile • Eye Contact • Energetic Start	3	Satisfactory Satisfactory Good Poor
2.	Did the speaker vary their tone, speed, volume?	3	You maintained a consistent tone and volume, but varying the speed slightly could improve engagement.
3.	Did they use any gestures with their hands or body while speaking?	3	Your posture and eye contact were good, but the use of hand gestures could be improved for better engagement.
4.	Did they have expressions on their faces?	3	Your facial expressions were present, but there is room for more expressiveness to connect with the viewer.
5.	Who are you and what are your skills, expertise, personality traits ?	4	You successfully introduced yourself, highlighted your skills in AI, and shared a bit about your personality.
6.	Why are you the best person to fit this role?	4	Your expertise in AI and project work on LLM and CNN makes you a good fit for the role.
7.	How are you different from others?	4	Your background in large language models and their security offers a unique value to the role.
8.	What value do you bring to the role?	4	You bring valuable expertise in AI and security, which is crucial for the Applied AI Scientist role at Google.
9.	Did the speech have a structure of Opening, Body and Conclusion?	3	The speech had elements of an opening and body but could benefit from a more defined conclusion.
10.	How was the quality of research for the topic? Did the student's speech demonstrate a good depth? Did they cite the sources of research properly?	3	The depth of research demonstrated about AI was decent, but citing sources or discussing Google's AI strategies could strengthen it.
11.	How creatively did the student present the video?	3	The presentation was straight to the point but could be more engaging with additional visual aids or storytelling elements.

12.	How convinced were you with the overall speech on the topic? Was it persuasive? Will you give them the job/opportunity?	3	Your speech was informative but could be more persuasive with stronger closing remarks; refining these aspects could increase the chance of securing the position.
